

PRESS RELEASE

August 2011

DAIRY FARMERS STADIUM - TOWNSVILLE

Dairy Farmers Stadium is the home of the North Queensland Cowboys rugby league club.

Havestock worked with the Townsville company, Minelli Constructions, to help replace the old original drainage system.

The old galvanised steel plates were cut out and replaced with Havestock's 150mm polymer-concrete drainage channel and heavy duty ductile iron grates.

"The grates were installed in 2 metre sections over the entire length of the grandstand; adding up to 50 metres in total." said Marty De-Wit, Havestock's Northern Region Sales Manager.

"Havestock's polymer-concrete channel and grate system makes drainage work quick and simple." said Marty.

Channels are available in various widths of 100, 150, 200 & 300mm. Grates are available in ductile iron, stainless steel, galvanised punched steel and mild steel.

Havestock channel products have been recently used on :

- TJH Airport Link Brisbane
- Corbould Park Racecourse Caloundra
- Shell Service Station - Toowoomba
- Malanda State School - FNQ
