KESSEL- slotted channels made of polymer concrete with a stainless steel attachment - centric and eccentric.

INSTALLATION VARIATIONS

Channels are non-sloped. Installation is done in a fared (stepped) method - channels available in 3 different heights.

The ends of all channel bodies are equipped with profiles for easy connection.

The gratings are generally available in lengths of 500 mm

The ends of all channel bodies are equipped with profiles for easy connection.

The gratings are generally available in lengths of 500 mm.

* TB = Trapping Box

Easy installation

Low weight and easy handling facilitate easy installation for professionals and building owners

Chemical resistance

High resistance to chemicals qualifies this channel even for the demanding field of chemical industrial plants.

For the first time!
Up to load class F900: The KESSEL-Lock is secured using only one screw!
